

We developed another free service called Home Finder. What Home Finder does is provide you with custom tailored information on any or all homes for sale in specific areas that YOU select.

Here's how Home Finder works: you tell the Home Finder computer about the type of home you want and the areas you prefer. The Home Finder computer will then research all the homes for sale by all the real estate

companies looking for the homes that meet your requirements.

The information you requested will be displayed immediately. As you view the information, you can study the information, and drive by the properties on your own. When you find homes that you want to see inside, a member of The Home Finder team can make arrangements for you to see that home at your convenience. Best of all, the Home Finder Service doesn't cost you a penny.

Unlike most realty and mortgage companies, we don't screen the information in any way, thereby letting you know all of your options. In fact, we will never call you about the listings we have sent you unless you call our team first. You'll get straight facts about all homes and all the zero and low down payment loans, or other types of loans, with no cost and no obligation.

Start your personalized search by clicking on the Property Search Button
